DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

Claim 1 is objected to because “case a” (line 17) should be --a case--.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 6, 8, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Motohashi et al. (JP 07-325444).

Motohashi disclose an image forming unit (13), an intermediate transfer member (14), recording material conveying means as the two rollers in figure 8 near the bottom right of the apparatus adjacent to the rightmost part of the dotted line, transfer means (23), a fixing unit (25), a first openable portion near the bottom right of the apparatus in figure 9, openable to expose the conveyance route, and a second openable portion (30) which is disposed on an upper face of the main body and is capable of being opening in a case of inserting the image forming unit (13), as shown by the arrow in figure 8, when the first openable portion is closed and being opened separately from the fixing unit (25), and holds the intermediate transfer member (14).

Regarding claim 4, the intermediate transfer member (14) and second openable portion (30) are shown structured in a united body.

Regarding claim 6, the image forming unit (13) is detachable in a vertical direction as shown in figure 8.

Regarding claim 8, the recording material conveying means includes a pair of rollers in figure 9, and one roller is held by the main body and the other is held by the first openable portion.

Regarding claim 12, the fixing unit (25) remains in the main body when the second openable portion (30) is opened with the first opening portion is closed. See figure 8.

Allowable Subject Matter

Claims 2, 3, 7, 13, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2852

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
